ELEGANCE, SECURITY AND INNOVATION

Comelit®
Passion.Technology.Design.

A LEADING BRAND
IN FIRE DETECTION
SYSTEMS FOR
30 YEARS.

For 30 years, Comelit group has been an international leader in the design of fire detection systems: a wealth of experience demonstrated by the 50,000+ systems we have created and the 2,000,000 detectors fitted.

Relying on Comelit therefore means choosing a recognised brand within the industry, which also offers an extremely wide and diverse range of products covering areas such as video entry, home automation, intrusion detection and video surveillance.

A single and knowledgeable representative for the protection of people and property.

An expression of the best Italian design tradition, Comelit is an international company with a network of 17 subsidiaries distributed across five continents and exports reaching over 90 countries. Anyone needing to operate in different markets will benefit from the reassurance of always being able to count on the guaranteed support of a dedicated on-site pre- and post-sales service.

A TECHNICAL OFFICE DEDICATED TO PLANNING AND DESIGN
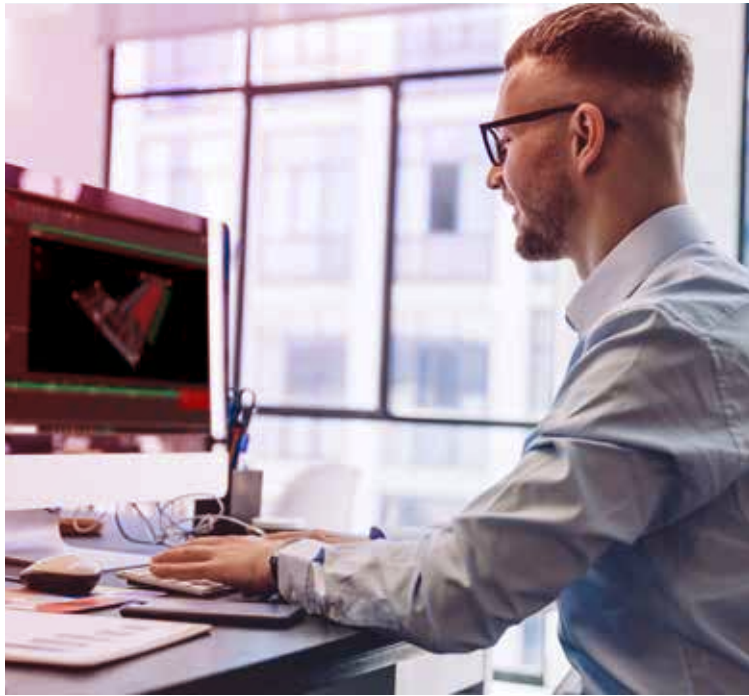

To remain close to its customers in a knowledgeable and effective way, Comelit makes use of a technical and sales staff with experience in fire detection systems, allowing customers to count on reliable representatives capable of identifying the most suitable solutions, supporting them during the installation process and providing a post-sales service.

Designing a fire detection system can turn into a complex task, especially if it needs to be integrated with other systems dedicated to protecting the building and keeping it secure. For this reason, Comelit offers its customers the assistance of a dedicated technical department, capable of supporting the customer's own technical department, with the aim of achieving the very best performance levels and using the systems to their full potential.

WITH YOU. ALWAYS.
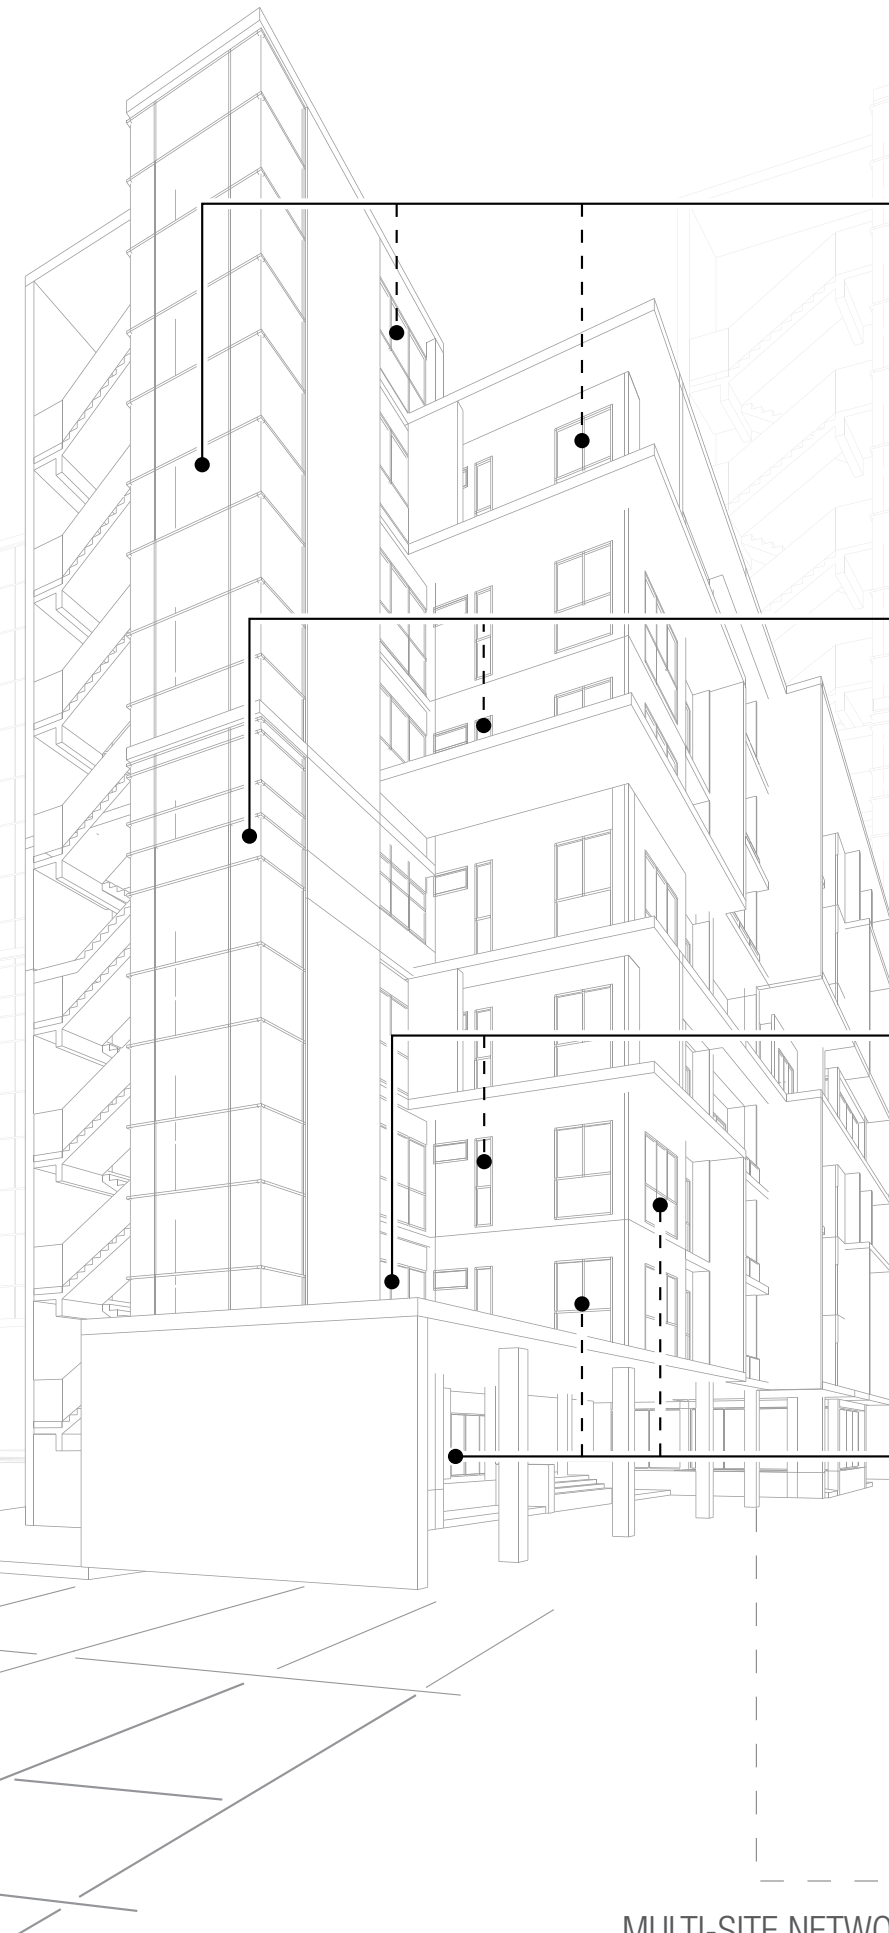

INTEGRATION AND INNOVATION TO ENSURE SAFETY.

The Comelit range of fire detection systems provides a complete solution to guarantee the safety of the people and their possessions inside a building, offering an effective response to all professional and prescriptive requirements.

The LOGIFIRE range of addressed control panels offers extremely flexible configuration, capable of guaranteeing high performance levels in all application contexts: from small spaces to shopping centres, from healthcare facilities and hospitals to manufacturing premises and from airport hubs to office buildings.

INTEGRATION:

- Voice Evacuation systems
- HORUS system manager
- ViP IP video entry systems
- MODBUS-ESPA systems

LOGIFIRE RANGE

MULTI-SITE NETWORK

EXPANDABLE TECHNIOLOGY, DESIGN AND CONNECTIVITY: LOGIFIRE IS A COMPLETE EVOLUTION.

LogiFire represents the complete technical and aesthetic evolution of the Comelit range of fire detection control panels.

Designed to adapt to all requirements, the new LogiFire control panels are modular and can be expanded up to 8 loops; they also offer the option of creating systems with 64 interconnected panels in a network. Cloud connection allows the monitoring of all systems, constantly checking their operating status and detecting any faults in order to provide timely intervention.

The design of the sensors is another strength: their elegant and logical lines make them perfect for installation in any environment. This design has also received several prestigious awards: Design Plus (Best of) 2020, German Design Award 2021, Red Dot Award 2021, Good Design Award 2021 and iF Product Design Award 2021.

EVAC SYSTEMS:
THE FRIENDLY VOICE THAT GUIDES YOU.

EVAC (Emergency Voice and Communication) voice evacuation systems perform an important role when it comes to safety and the management of evacuation plans.

Integration with the LogiFire range means that all types of evacuation can be managed properly and in a structured manner, preventing crowds from forming and avoiding panic. Direct communication, via protocol, with Logifire series control panels allows programming of automatic system actions on the basis of the source of the alarm and can also be used to implement differentiated delays, thereby prioritising the evacuation of the most critical areas.
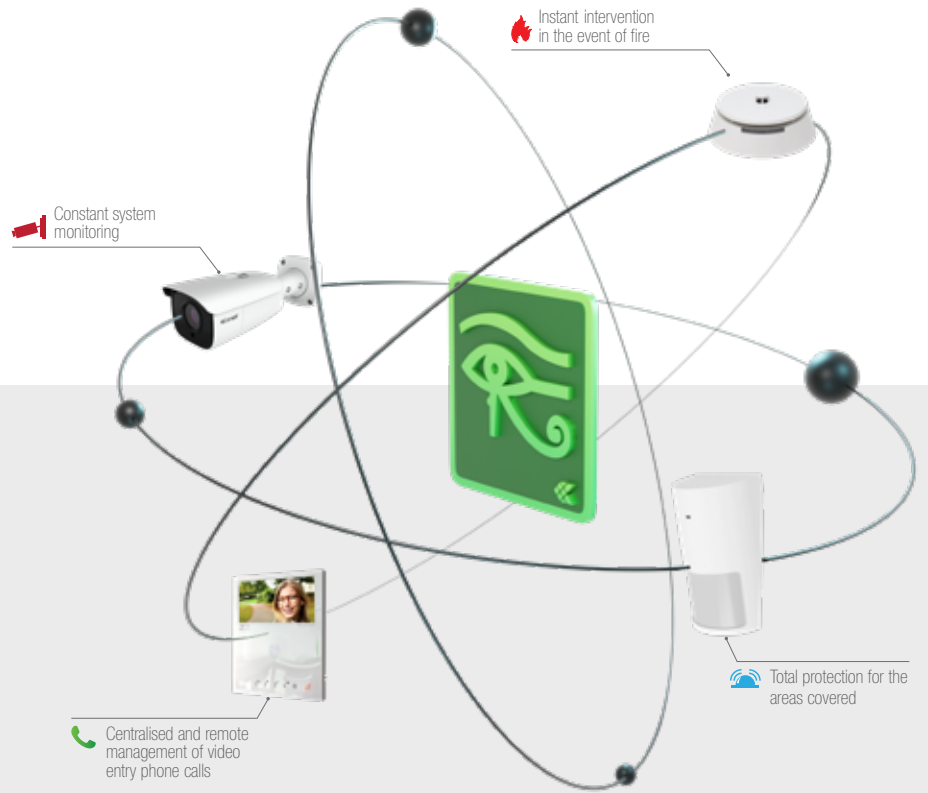

HORUS: A SINGLE SYSTEM MANAGER FOR ALL SYSTEMS.

LOGIFIRE

in the event of fire

Constant system
monitoring

Centralised and remote
management of video
entry phone calls

Total protection for the
areas covered

Integration between the fire detection system and other protection systems - such as video surveillance and intruder alarm systems - provides outstanding prevention and keeps the people inside the building safe. The Horus system manager by Comelit is the solution for monitoring all systems using graphic maps from a single workstation, making it significantly easier for security managers to carry out their tasks.

For example, when faced with a fire alert from any device, Horus can enable viewing of the closest camera, for instant event verification. That's not all: the platform can also be used to program automations and custom scenarios based on your own requirements, such as switching on certain lights to assist in evacuating people from the building using a specific route, unlocking exits, inhibiting ventilation or playing a voice message.

LOGIFIRE AND VIP: STRONGER TOGETHER.

The integration of the LogiFire fire detection system with the Comelit IP video entry system means that the safety of a building can always be kept under control. The ViP system actually uses a specific interface to receive information relating to alarm indications and distributes it in a logical and structured manner by apartment, floor or area. Alarm messages are sent directly to the door entry monitor by means of a pop-up and an audible alert and, if a Wi-Fi connection is available, the user will have the option of receiving notifications relating to the event in progress on their smartphone, via ComelitApp. If there is a porter switchboard in the building, this becomes an instrument for receiving all alarm/fault conditions occurring on the fire alarm control panel.

MYCOMELIT APP. THE FIRST APP TO SUPPORT THE WORK OF PROFESSIONALS IN EVERY ASPECT.

The new MyComelit App is the digital transposition of all the services Comelit offers its professionals, to support them in their work at all times in line with the motto "With You. Always."

With this App - the only one of its kind in terms of comprehensiveness and versatility - it is as if all of Comelit is there with you, all the time: it is a tool which makes your daily work easier, helps you to resolve problems and difficulties, promptly informs you of offers and new products, supports you in your training and rewards you for your success.

The App guides professionals through the entire journey of selection, purchase, installation and post-installation, offering them all the information they require to give them the best possible response to their needs.

THE PROFESSIONAL AT THE CENTRE OF OUR WORLD

A SINGLE CONTACT FOR YOUR PROFESSIONAL AND INTEGRATED SYSTEMS.

An entire company at your service. For someone in your field, knowing you can count on the know-how and skill of an Italian company capable of competently meeting all your requirements is certainly a significant advantage. Comelit, in fact, can advise you and offer you the best and most versatile highly integrated solutions, including video entry, video surveillance and intruder alarms, home automation and access control plus fire detection. Having a single representative means being able to count on one contact for all the problems you may need to tackle in your work, providing assistance and guiding you when choosing the product or system that best suits your customer's requirements.

MYCOMELIT PRO: THE CONSTANT DIGITAL DIALOGUE BETWEEN YOU AND THE PRODUCTS INSTALLED.

Entering the world of Comelit also means having a completely new and stimulating experience.
Not just products and solutions, but a whole company at your service. With the MyComelit Pro website, every installer is constantly informed of the new products most relevant to them, and can access manuals, technical and installation sheets as well as video tutorials to easily find solutions to meet your needs.

Follow us on:

COMELIT TECHNICAL ASSISTANCE FOR PLANNING ADVICE AND ON-SITE SUPPORT.

Professionals can always count on the valuable support offered by the Comelit technical assistance service: a fast response to queries and requests for information, on-site assistance and design advice.

UTCE

Professional telephone support for resolving every type of problem.

ASSISTED PROGRAMMING

Support for installers from specialised professionals, and technical assistance.

COMELIT ENGINEERING

Comelit Engineering is a division dedicated entirely to providing customers with the ideal solutions for all requests for non-standard systems.

PROFESSIONAL REFRESHER COURSES. EVEN ONLINE.

Training and keeping up to date is essential here at Comelit. This is why we organise for regular intensive theory and practical technical courses on our new systems to be held at our Training Center, putting you straight to the test with our dedicated staff.

Thanks to ACADEMY WEBINARS, our professionals are always at your side, even in an online capacity. High-level professionalism and a wide range of free courses are at your disposal.
